PROFILE

Software Engineering student at UKM, currently completing an internship with The Malaysian Cohort at UMBI. I build mobile and web applications with Flutter, React, Supabase and useful AI integrations, taking projects from requirements through implementation, testing and documentation.

INTERNSHIP

Software Engineering Intern

UMBI / The Malaysian Cohort (TMC), UKM

3 Sep 2026 - 19 Jan 2027 (scheduled completion)
Internship location: Cheras, Selangor, Malaysia

- Contributing to mobile and web development in healthcare research, including the MyCohort mobile application.
- Developed the TMC Research & Publications website using React and TypeScript, with searchable research and publication content.
- Contributing to website and wellness-centre prototypes, with formal review and official release pending.

EDUCATION

Universiti Kebangsaan Malaysia (UKM)

Bachelor of Software Engineering with Honours
(Information System Development)

Expected graduation: August 2027

TECHNICAL SKILLS

Mobile: Flutter, Dart, Kotlin, Android Studio
Web: React, TypeScript, JavaScript, HTML, CSS, PHP
Data & AI: Supabase, PostgreSQL, Auth, Storage, Edge Functions, Groq AI
Engineering: Java, OOP, requirements analysis, system design, software testing, debugging and technical documentation

LEADERSHIP & LANGUAGES

Led university teams of 4-6 students, including the CareBridge academic hospital appointment application, coordinating responsibilities and delivery.

Arabic: Native | **English:** Professional working proficiency

Selected work

Practical software. Clear contribution. Real project evidence.

DIACARE

Individual final-year project, UKM | May - Jul 2026
Flutter, Dart, Kotlin, Supabase, Groq AI

- Independently designed and developed an Android diabetes self-management application, managing requirements, UI, database integration, testing and documentation.
- Combined glucose and meal records, Malaysian food context, activity guidance, medication reminders, education and date-range PDF reports.
- Integrated native Android reminders with Kotlin and educational AI chat, nutrition estimates and report summaries through backend functions.
- Completed academic application. AI responses provide educational support.

Screenshots and project details

TMC RESEARCH & PUBLICATIONS

Internship project | Sep - Oct 2026
React, TypeScript, Vite, Tailwind CSS

- Developed a responsive website for browsing TMC studies, subprojects and publications, including search, filtering and original-source links.
- Organized institutional content in local TypeScript data. Frontend prototype delivered; review and WordPress migration pending.

Project preview

UMBI WELLNESS CENTRE PROTOTYPE

Internship project | Sep - Oct 2026
HTML, CSS, JavaScript, PHP, Supabase

- Contributed to a prototype for wellness packages, custom plans, appointment preferences and a restricted staff dashboard.
- Demo request and tracking flows; acceptance pending. No live payments or production booking service.

Project preview

TMC PUBLIC WEBSITE REDESIGN

Internship project | Sep - Oct 2026
HTML, CSS, JavaScript, Tailwind CSS, PHP

- Contributed to a seven-page website preview covering participant guidance, biobank information, news, resources and contact.
- Presentation preview delivered. Officer approval, UAT and official release remain separate milestones.

Project preview

MYCOHORT MOBILE APPLICATION

The Malaysian Cohort, UMBI / UKM | Internship

- Contributing to mobile application development for The Malaysian Cohort project.
